

Citizen-based Monitoring in the Classroom

June 23-27, 2014

UW-Waukesha Field Station

2 free credits available

Free equipment

Join scientists and educators from the Department of Natural Resources for a week of citizen science. Learn about citizen-based monitoring programs from dragonflies to bird-feeders to stream health and how you and your students can get involved.

Spend time in the field learning about monitoring programs and identifying plants and animals. Spend time inside experiencing classroom activities and discussing how to integrate into your science program.

Cost: \$50. Two free credits plus a variety of equipment will be supplied thanks to a generous grant from the Dutton Foundation.

Here is the general line-up for the week.

Monday – Stream monitoring

Tuesday – Birds and herps (frog, turtles)

Wednesday – Invasives and lake monitoring

Thursday – Mussels and dragonflies and more

Friday – Class presentations and successful programs

If interested, leave us your name and contact information or contact: Carrie Morgan at 608-267-5239, Carrie.Morgan@wisconsin.gov Registration material will go out in April. Limited to 30 participants.
